

XXIX.—*On the Wild Cattle of England.* By SIR PHILIP GREY EGERTON, M.P., F.R.S., &c.

*To the Editors of the Annals of Natural History.*

Gentlemen,

As no mention was made in Mr. Hindmarsh's communication to the British Association at Newcastle, "On the Wild Cattle of Chillingham Park\*," of the existence formerly of a breed of wild cattle at Bishops Auckland, the following extract may be worthy of record:—It is copied from a MS. in my possession, entitled, "The Second Yeares Travell. thorow Scotland and Ireland, 1635." The writer passes a few days on his road to Scotland "att Bishoppe-Auckland w<sup>th</sup> Dr. Moreton, Bishoppe of Durham: who maintaines great hospitalitie, in an orderly well-governed house, and is a verye worthy Reverend Bishoppe." After describing the palace, "chapples," &c., he mentions "A daintie stately parke: where-in I saw wild bulls and kine: w<sup>ch</sup> had 2 calves ruñers; there are about 20 wild beasts all white: will nott endure yo<sup>r</sup> approach: butt if they bee enraged or distressed, verye violent and furious: their calves will bee wonderous fatt."

I have the honour to be

Your obedient servant,

PHILIP GREY EGERTON.

---

XXX.—*On three undescribed Species of the Genus Cimex, closely allied to the Common Bed-Bug.* By the Rev. LEONARD JENYNS, M.A., F.L.S., &c.†

[With a Plate.]

I AM not aware that any entomologist has described more than one species of the genus *Cimex*, as restricted at the present day, although Latreille has alluded to a second, found on

\* See Mr. Hindmarsh's paper, vol. ii. p. 282, which also contains notices of the existence of this breed at Hamilton, Lynn Park, Chartley Park; and formerly at Burton Constable, and Drumlanrig, with ancient descriptions of them from Hector Boethius and Bishop Leslie.

† Read to the Natural History Section of the British Association at Newcastle, August 23, 1838; and communicated by the Author.
